

Volta Finance Limited (VTA / VTAS) – August 2018 monthly report

NOT FOR RELEASE, DISTRIBUTION OR PUBLICATION, IN WHOLE OR IN PART, IN OR INTO THE UNITED STATES

Guernsey, 20 September 2018

AXA IM has published the Volta Finance Limited (the “Company” or “Volta Finance” or “Volta”) monthly report for August. The full report is attached to this release and will be available on Volta’s website shortly (www.voltafinance.com).

PERFORMANCE and PORTFOLIO ACTIVITY

In August, Volta’s Estimated NAV* performance was +1.2%, a positive performance in a context of modestly constructive credit markets in general. Volta will pay a dividend of 0.15 euro per share on 27 September 2018 (Ex-dividend date was 6 September 2018).

In August, mark-to-market performances of Volta’s asset classes, in local currencies, were: +1.4% for Bank Balance Sheet Transactions; +0.9% for CLO Equity tranches; +1.1% for CLO Debt tranches, +0.2% for Cash Corporate Credit deals and +0.4% for ABS.

Despite the oversupply situation in the CLO space (mostly affecting the spread at which AAA/AA and A rated tranches are issued), the mezzanine tranches of CLO owned by Volta (mostly BB rated tranches) performed positively this month reflecting the fact that on a fundamental basis these assets continue to perform well.

During the month Volta did not make any new investments but the equivalent of €5.3m was drawn from existing positions (various contributions to the 3 CLO warehouses that have been opened previously and contributions to the existing CMV and Crescent). On average and under market standard assumptions, the projected IRR of such instruments is in the area of 16%. It is worth mentioning that a previous warehouse closed in August, delivering through its four and one half months of existence an IRR slightly below 20%.

In August, Volta generated the equivalent of €1.0m in interest and coupons net of repo costs (non-euro amounts translated into euro using end-of-month cross currency rates). This brings the total cash amount generated during the last six months in terms of interest and coupons to €19.6m, a level unseen for several years.

This time, the increasing amount of interest and coupons generated by Volta’s assets on a six-month basis was mostly due to the closing of one warehouse (with the payment, at this point in time of the cumulative interest collected through its four and one half month duration).

As planned, we continue to allocate capital to CLO warehousing facilities in order to source new CLO equity positions with attractive economic terms. It is anticipated that two warehouses to which Volta contributed this month should lead to a CLO pricing during Q3 2018. Expected returns on such CLO equity positions are in the area of 13% to 15%.

As of the end of August 2018, Volta’s Estimated NAV was €309.6m or €8.46 per share. The GAV stood at €355.3m.

**It should be noted that approximately 10.9% of Volta’s GAV comprises investments for which the relevant NAVs as at the month-end date are normally available only after Volta’s NAV has already been published and an investment in one subordinated note security for which a fully up-to-date price might be unavailable. Volta’s policy is to publish its own NAV on as timely a basis as possible in order to provide shareholders with Volta’s appropriately up-to-date NAV information. Consequently, such investments are valued using the most recently available NAV for each fund or quoted price for such subordinated note. The most recently*

available fund NAV or quoted price was for 7.5% as at 31 July 2018, for 1.3% as at 30 June 2018 and for 2.1% as at 31 March 2018.

** "Mark-to-market variation" is calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at month-end, payments received from the assets over the period, and ignoring changes in cross currency rates. Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.
