### **January Monthly Report**

At 29 January 2016

By obtaining access to and reviewing this monthly report, you acknowledge and agree to be bound by the following:

This monthly report does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares or other securities of Volta Finance Limited (the "Company") whose portfolio is managed by AXA Investment Managers Paris (the "Investment Manager"), or securities of any other entity (together, the "Securities"). Nor shall this monthly report or any part of it nor the fact of its distribution or publication (on the Company's website or otherwise) form the basis of, or be relied on in connection with, any contract or investment decision in relation to the Securities. This monthly report does not constitute a recommendation regarding the Securities. The information contained herein is for information purposes only, does not purport to contain all the information that may be required to evaluate the Company or any other entity or their respective financial positions.

This monthly report speaks only as of its date and neither the Company nor the Investment Manager is under any obligation to update the information contained herein. Certain information and estimates contained herein are originated by or derived from third parties and therefore the accuracy and completeness of such information and estimates has not been verified. It should also be noted that the financial information contained herein has not been audited. No representation or warranty whatsoever, whether express or implied, is given by or on behalf of the Company, the Investment Manager, their affiliates, or their respective directors, officers or employees or any other person as to (a) the accuracy or completeness of the information or (b) the opinions contained in this monthly report. None of the Company, the Investment Manager, any of their affiliates, or their respective directors, officers or employees or any other person accepts any liability whatsoever for any such information or opinions. Nothing contained herein shall be relied upon as a promise or representation whether as to past or future performance of the Company, any other entity, any Securities or any asset class in the Company's portfolio. No statement in this monthly report is intended to be nor may be construed as a profit forecast and there can be no assurance that the assumptions described herein, the returns and targets (including without limitation target portfolio composition) indicated herein will be achieved.

The valuation of financial assets can vary significantly from the prices that the Company could obtain if it sought to liquidate the positions due to market conditions and general economic environment. Such valuations do not constitute a fairness or similar opinion and should not be regarded as such. They follow the valuation policy of the Company as adapted from time to time in the best interests of the shareholders, taking into account the evolutions and the illiquidity of financial markets.

## Comment

### Dear Shareholders and Investors,

### PERFORMANCE

At the end of January 2016, the Estimated NAV<sup>1</sup> of Volta Finance Limited (the "Company", "Volta Finance" or "Volta") was €274.4m or €7.51 per share, a decrease of €0.31 per share

The NAV performance for January was -4.0% following a gain of 10% for calendar year 2015 (including the April and December dividend payments). This negative performance for January was mainly caused by the decline in prices of CLO debt tranches.

The GAV stood at €318.2m at the end of January 2016.

In January, mark-to-market variations<sup>2</sup> of Volta's asset classes were: -0.2% for Synthetic Corporate Credit deals; -2.4% for CLO Equity tranches; -5.7% for CLO Debt tranches, +2.5% for Cash Corporate Credit deals; and, +0.6% for ABS.

Once again in January, Volta benefited from its diversification across and within various sub-asset classes, being able to partially mitigate the sharp downward revision in CLO debt prices thanks to the varying correlation that exists with some other portions of the portfolio.

### MARKET REVIEW AND PORTFOLIO ACTIVITY

In January 2016, credit markets were shaky again, with a negative performance from corporate credit bonds and the US and the European loan markets.

In January, Volta received the equivalent of €5.1m in interest and coupons (non-Euro amounts translated into Euro using end-of-month cross currency rates) bringing the total cash amount received in terms of interest and coupons during the last six months to €15.9m.

In early January, Volta sold 2 USD CLO debt tranches (at an average projected yield at Libor+350bp) and received the principal payment from one Euro CLO debt tranche for a total of €7.2m. These funds were reinvested in February at significantly wider spreads (Libor + 975bp on average). For several months, we have redeemed and sold CLO 1.0 debt tranches, replacing them with higher yielding CLO 2.0 tranches.

Cash or cash equivalent instruments at the end of January totalled €16.7m. The cash flows received from our assets have increased in the most recent months and should continue to do so.

## **Comment (continued)**

Despite the significant stress in credit and equity markets over the past 6 months, this has not been reflected materially on the company's Estimated NAV which, with a fall of 4.8% between the end of July 2015 and end of January 2016 has exhibited relative stability. This has been achieved thanks to the relatively conservative approach adopted over recent years, combined with the breadth and flexibility of mandate available to Volta, which enables us to be selective and opportunistic. That has been reflected in alpha relative to both opportunity set and peer group.

We continue to see opportunities in several structured credit sectors including mezzanine or equity tranches of CLOs, RMBS tranches as well as tranches of Cash or Synthetic Corporate Credit portfolios.

#### Announcement of election of Home Member State

EU Directives 2004/109/EC, 2007/14/EC and 2013/50/EU, which are frequently referred to together as the EU Transparency Directive ("EUTD") require issuers of securities listed on an EU regulated market to publicly disclose their Home Member State. In accordance with the EUTD, Volta hereby discloses that its Home Member State is the Netherlands.

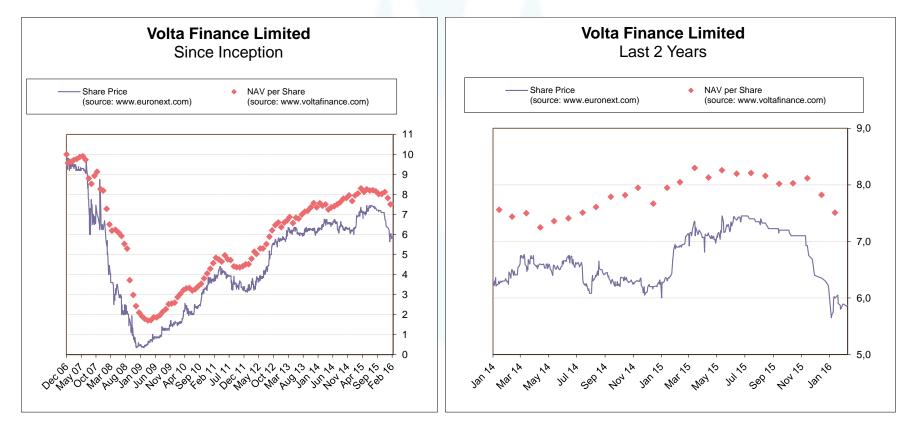

<sup>1</sup> It should be noted that approximately 11.0% of Volta's NAV comprises investments in funds for which the relevant NAVs as at the month-end date are normally available only after Volta's NAV has already been published. Volta's policy is to publish its own NAV on as timely a basis as possible in order to provide shareholders with Volta's appropriately up-to-date NAV information. Consequently, such investments in funds are valued using the most recently available NAV for each fund. As at 31 January 2016, the most recently available fund NAV was as at 31 December 2015 for 10.4% of Volta's NAV and as at 30 September 2015 for 0.6% of Volta's NAV.

<sup>2</sup> "Mark-to-market variation" is calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at month-end, payments received from the assets over the period, and ignoring changes in cross currency rates Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.

## **About Volta Finance Ltd**

Volta Finance Limited is incorporated in Guernsey under The Companies (Guernsey) Law, 2008 (as amended) and listed on Euronext Amsterdam and the London Stock Exchange's Main Market for listed securities. Volta's home member state for the purposes of the EU Transparency Directive is the Netherlands. As such, Volta is subject to regulation and supervision by the AFM, being the regulator for financial markets in the Netherlands.

Volta's investment objectives are to preserve capital and to provide a stable stream of income to its shareholders through dividends. For this purpose, it pursues a multi-asset investment strategy targeting various underlying assets. The assets that the Company may invest in either directly or indirectly include, but are not limited to: corporate credits; sovereign and quasi-sovereign debt; residential mortgage loans; automobile loans. Volta Finance Limited's basic approach to its underlying assets is through vehicles and arrangements that provide leveraged exposure to some of those underlying assets. Volta Finance Limited has appointed AXA Investment Managers Paris, an investment management company with a division specialised in structured credit, for the investment management of all its assets.

#### Synthetic Corporate Credit

This asset class regroups the Company investments in securities issued by collateralised swap obligations ("CSO") as well as bank balance-sheet transactions. Through this asset class, the Company aim to get an exposure to investment grade, sub-investment grade or unrated credits. The vast majority of these credit exposures are investment grade corporate credit exposures mainly through synthetic arrangements such as Credit Default Swaps ("CDS").

This asset class is split depending on the subordination to default of the securities. The equity positions have no subordination to default but receive a high cash-on cash payment; the debt positions benefit from subordination to default and receive a lower coupon payment.

Through a bank balance-sheet transaction, the Company aim to get an equity or mezzanine exposure to a specific core business of a bank. They are structured through synthetic arrangements, such as CDS, Total Return Swap or Credit Linked Note and are often private transactions.

#### CLO

This asset class regroups the Company investments in securities issued by actively managed Collateralized Loan Obligations (CLO). This asset class is split based on the risk position within the CLO capital structure (ie between equity and mezzanine debt positions) and on the geographical main exposures of the underlying portfolio (ie US or European senior secured loans).

#### Cash Corporate Credit

This asset class offers a direct exposure to corporate credit portfolios (either investment grade, high yield or unrated). It currently encompasses an unlevered fund of leverage loans, a small and medium enterprise CLO equity tranche and an emerging market CDO debt tranche offering a cash exposure to a portfolio of mainly emerging market corporates.

#### ABS

This asset class regroups the Company investments in securities issued by structures for which payments depends on residential mortgage loans. This asset class is split based on the riskiness of the positions (ie between Residual Interest and debt tranches)
