## Volta Finance Limited

## October Monthly Report

## At 31 October 2014

By obtaining access to and reviewing this monthly report, you acknowledge and agree to be bound by the following:
This monthly report does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares or other securities of Volta Finance Limited (the "Company") whose portfolio is managed by AXA Investment Managers Paris (the "Investment Manager"), or securities of any other entity (together, the "Securities"). Nor shall this monthly report or any part of it nor the

 any other entity or their respective financial positions.

 has not been audited. No representation or warranty whatsoever, whether express or implied, is given by or on behalf of the Company, the Investment Manager, their affiliates, or their respective directors, officers or

 as to past or future performance of the Company, any other entity, any Securities or any asset class in the Company's portfolio. No statement in this monthly report is intended to be nor may be construed as a profit forecast and there can be no assurance that the assumptions described herein, the returns and targets (including without limitation target portfolio composition) indicated herein will be achieved.

The valuation of financial assets can vary significantly from the prices that the Company could obtain if it sought to liquidate the positions due to market conditions and general economic environment. Such valuations do
 evolutions and the illiquidity of financial markets.

## Comment

## Dear Shareholders and Investors,

At the end of October 2014, the Gross Asset Value* (the "GAV") of Volta Finance Limited (the "Company", "Volta Finance" or "Volta") was €287.0 m or $€ 7.82$ per share, an increase of $€ 0.03$ per share from the end of September 2014.

This brings the performance for the first 10 months of 2014 to $+10.3 \%$ including the April dividend payment.
The October mark-to-market variations* of Volta's asset classes were: $-0.1 \%$ for Synthetic Corporate Credit deals, $+0.3 \%$ for CLO Equity tranches; $+1.3 \%$ for CLO Debt tranches, $-0.5 \%$ for Cash Corporate Credit deals and $+3.4 \%$ for ABS. The positive performance of Volta in October is in line with a modest tightening of credit market spreads during the month. These movements masked some intra-month volatility as credit markets reacted to the growth scare early in the month. Accommodative stances of central banks (especially the ECB) later in the month help restoring confidence.

Volta's assets generated the equivalent of $€ 3.3 \mathrm{~m}$ cash flows in October 2014 (non-Euro amounts converted to Euro using end-of-month cross currency rates and excluding principal payments from debt assets) bringing the total cash generated during the last six months to $€ 14.7 \mathrm{~m}$.

In October, Volta made one investment (a BB tranche of a new USD CLO) for the equivalent of $€ 4.1 \mathrm{~m}$. Under standard assumptions this asset is expected to have an IRR close to $9 \%$.

At the end of October, Volta held $€ 14.1 \mathrm{~m}$ in cash not taking into account the $€ 4.1 \mathrm{~m}$ to be settled in the coming weeks. Taking account of the further unsettled commitment of $€ 4 m$ to the CESL Fund and the dividend payment to be made in December, Volta can be considered as being nearly fully invested.

## Comment (continued)

## MARKET ENVIRONMENT

In October 2014, credit market spreads tightened both in Europe and in the US: the 5 year iTraxx European Main index and 5 year iTraxx European Crossover Index (series 21) spreads went respectively from 63 and 257 bps at the end of September 2014 to 56 and 240 bps at the end of October 2014. In the US, in the same vein, the 5y CDX main index (series 22 ) tightened from 64 to 56 bps. According to the CSFB Leverage Loan Index, the average price for US liquid first lien loans was roughly unchanged from $97.67 \%$ at the end of September 2014 to $97.61 \%$ at the end of October 2014. In Europe, the price of the S\&P European Leveraged Loan Index modestly decreased from $95.36 \%$ to $94.90 \%$. **

## VOLTA FINANCE PORTFOLIO

In October 2014, no particular event materially impacted any of Volta's assets.
We continue to see opportunities in several structured credit sectors including mezzanine or equity tranches of CLOs, RMBS tranches as well as tranches of Cash or Synthetic Corporate Credit portfolios.

* "Mark-to-market variation" is calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at month-end, payments received from the assets over the period, and ignoring changes in cross currency rates Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.
** Index data source: Markit, Bloomberg.

## About Volta Finance Ltd

#### Abstract

Volta Finance Limited is incorporated in Guernsey under the Companies (Guernsey) Law, 2008 (as amended) and listed on NYSE Euronext Amsterdam. Its investment objectives are to preserve capital and to provide a stable stream of income to its shareholders through dividends. For this purpose, it pursues a multiasset investment strategy targeting various underlying assets. The assets that the Company may invest in either directly or indirectly include, but are not limited to: corporate credits; sovereign and quasi-sovereign debt; residential mortgage loans; automobile loans. Volta Finance Limited's basic approach to its underlying assets is through vehicles and arrangements that provide leveraged exposure to some of those underlying assets.

Volta Finance Limited has appointed AXA Investment Managers Paris, an investment management company with a division specialised in structured credit, for the investment management of all its assets.

## Synthetic Corporate Credit

This asset class regroups the Company investments in securities issued by collateralised swap obligations ("CSO") as well as bank balance-sheet transactions Through this asset class, the Company aim to get an exposure to investment grade, sub-investment grade or unrated credits. The vast majority of these credit exposures are investment grade corporate credit exposures mainly through synthetic arrangements such as Credit Default Swaps ("CDS").

This asset class is split depending on the subordination to default of the securities. The equity positions have no subordination to default but receive a high cash-on cash payment; the debt positions benefit from subordination to default and receive a lower coupon payment.

Through a bank balance-sheet transaction, the Company aim to get an equity or mezzanine exposure to a specific core business of a bank. They are structured through synthetic arrangements, such as CDS, Total Return Swap or Credit Linked Note and are often private transactions.

## CLO

This asset class regroups the Company investments in securities issued by actively managed Collateralized Loan Obligations (CLO). This asset class is split based on the risk position within the CLO capital structure (ie between equity and mezzanine debt positions) and on the geographical main exposures of the underlying portfolio (ie US or European senior secured loans).

## Cash Corporate Credit

This asset class offers a direct exposure to corporate credit portfolios (either investment grade, high yield or unrated). It currently encompasses an unlevered fund of leverage loans, a small and medium enterprise CLO equity tranche and an emerging market CDO debt tranche offering a cash exposure to a portfolio of mainly emerging market corporates.

## ABS

This asset class regroups the Company investments in securities issued by structures for which payments depends on residential mortgage loans. This asset class is split based on the riskiness of the positions (ie between Residual Interest and debt tranches)
