### Background and Investment Objective

AXA Investment Managers Paris (“AXA IM”) has been the Investment Manager of Volta Finance Limited (“Volta”) since inception. Volta’s investment objectives are to preserve capital across the credit cycle and to provide a stable stream of income to its Shareholders through dividends. For this purpose, Volta pursues a multi-asset investment strategy on deals, vehicles and arrangements that provide leveraged exposure to target Underlying Assets (including corporate credit, residential and commercial mortgages, auto and student loans, credit card and lease receivables).

## Monthly Report – May 2022

### Monthly Commentary

In May, the CLO market experienced a brutal price adjustment, reversing 4 months of solid outperformance relative to classic credit and equity markets. In May Volta NAV was down 11.8%, and with a year-to-date performance for Volta at -10.5%, the five-month performance has moved to be roughly in line with that of US or European High Yield, which are down respectively at -7.8% and -8.7%.

Over the investment cycle, Volta is targeting a far higher return than conventional high-yield bonds and continues to receive a cash-on-cash return in the high teens from its investments, which is our expectation even in mildly stressed markets.

In May, Volta received the equivalent of €1.6m in terms of interest and coupons. For the 6 months ended May 2022, Volta received €22.7m interest and coupons representing a 19.3% annualized cash flow to NAV.

Turning to the broad underlying asset classes, the monthly performances\*\* were: +2.4% for Bank Balance Sheet transactions, -13.6% for CLO equity tranches; -9.0% for CLO debt; -0.4% for Cash Corporate Credit and ABS (together representing 2.9% of NAV).

At the time of writing this comment, there is anecdotal evidence of improving prices in the secondary market and we expect that part of the downward price adjustment in May to be recouped in June.

Our medium-term view is unchanged: we still think that we may see an increase in default rates: towards circa 1% this year, rising to the 2% to 3% range for 2023 (albeit US loans being less impacted than European). We consider such default levels should not be a concern given that the longer-term historical average is slightly below 3%.

Although the consensus view is that inflation is an issue, it is worthwhile reflecting that inflation has not been a major problem for the credit market historically. Despite rising inflationary pressures over the last 18 months, default rates have remained very low (over the last 12 months default rates are at 0.2% in the US and 0.8% in Europe). Furthermore, the longest period of inflation (for the last 50 years) was between 1972 and 1981 and that period coincides with the longest period of benign defaults in the US (through these 10 years the US high-yield bond and loan markets averaged annual default rates close to 1.5/2%). It is all too easy to underestimate the effect of inflation on debt erosion. In 2021, the vast majority of CLO loans, both in Europe and the US were refinanced, and now have maturities in 2028/29. Everything else being equal, with 5% inflation and 2% growth, the real value of 1\$ debt is only 62 cents after 7 years, far easier to refinance.

It is also worthwhile reflecting that in 2020/21, in just 2 years, corporate profits rose by 30% or so (in the US and Europe). US corporate profits (excluding financials), for example, reached an unprecedented high last year at 8% of US GDP (a 50-year record high), compared with an average level for the last 25 years of 6.18%. When considering the last 15 years (including the GFC and the Covid Crisis) defaults have tended to start to seriously materialize once corporate profits fall below 6% of GDP (the previous two lows were 4.43% in Q2 2009 and 5.49% in Q2 2020). This suggests that if overall profits were to be flat or even to decrease by 10 or 15% in the coming 2 years it is not expected to cause any significant wave of defaults.

Looking ahead to the next few quarters, we do not believe that there are any signs that Volta is likely to suffer from a diversion of cash flows from its CLO Equity positions. Indeed, Volta cashflows have been increasing every month for the last 4 months (measured as the rolling 6-month cashflows to avoid seasonality). Receiving a continuing high level of cash flows should allow us to take advantage of opportunities arising from the current market environment while maintaining the payment of a steady quarterly dividend.

As at the end of May 2022, Volta's NAV was €233.0m or €6.37 per share.

*\*It should be noted that approximately 4.0% of Volta's GAV comprises investments for which the relevant NAVs as at the month-end date are normally available only after Volta's NAV has already been published. Volta's policy is to publish its NAV on as timely a basis as possible to provide shareholders with Volta's appropriately up-to-date NAV information. Consequently, such investments are valued using the most recently available NAV for each fund or quoted price for such subordinated notes. The most recently available fund NAV or quoted price was 3.4% as at 30 April 2022 and 0.6% as at 31 March 2022.*

*\*\* "performances" of asset classes are calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at period ends, payments received from the assets over the period, and ignoring changes in cross-currency rates. Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.*

## Volta Finance Ltd Monthly Report – May 2022

### Important Information

This monthly report is published by AXA Investment Managers Paris ("AXA IM"), in its capacity as alternative investment fund manager (within the meaning of Directive 2011/61/EU, the "AIFM Directive") of Volta Finance Limited (the "Company") whose portfolio is managed by AXA IM. This monthly report is intended only for the person to whom it has been delivered. By obtaining access to and reviewing this monthly report, you acknowledge and agree to be bound by the following: No part of this document may be reproduced in any manner without the prior written permission of AXA IM. This monthly report does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares or other securities of the Company whose portfolio is managed by AXA IM, or securities of any other entity (together, the "Securities"). The Securities described in this monthly report may not be eligible for sale in some states or countries and may not be suitable for all types of investors. Prospective investors are advised to seek expert legal, financial, tax and other professional advice before making any investment decision. Securities in the Company may not be offered or sold directly or indirectly into the United States or to U.S. Persons. Nor shall this monthly report or any part of it nor the fact of its distribution or publication (on the Company's website or otherwise) form the basis of, or be relied on in connection with, any contract or investment decision in relation to the Securities. This monthly report does not constitute a recommendation to buy, sell or hold the Securities. The information contained herein is for information purposes only, does not purport to contain all the information that may be required to evaluate the Company or any other entity or their respective financial positions. This monthly report speaks only as of its date and neither AXA IM nor the Company is under any obligation to update the information contained herein. Certain information and estimates contained herein are originated by or derived from third parties and the accuracy and completeness of such information and estimates has not been verified. It should also be noted that the financial information contained herein has not been audited. No representation or warranty whatsoever, whether express or implied, is given by or on behalf of AXA IM, the Company, their affiliates, or their respective directors, officers or employees or any other person as to (a) the accuracy or completeness of the information or (b) the opinions contained in this monthly report. None of AXA IM, the Company, any of their affiliates, or their respective directors, officers or employees or any other person accepts any liability whatsoever for any such information or opinions. Nothing contained herein shall be relied upon as a promise or representation whether as to past or future performance of the Company, any other entity, any Securities or any asset class in the Company's portfolio. The figures provided that relate to past months or years and past performance cannot be relied on as a guide to future performance or construed as a reliable indicator as to future performance. Throughout this review, the citation of specific trades or strategies is intended to illustrate some of the investment methodologies and philosophies of the Company, as implemented by AXA IM. The historical success or AXA IM's belief in the future success, of any of these trades or strategies is not indicative of, and has no bearing on, future results. No statement in this monthly report is intended to be nor may be construed as a profit forecast and there can be no assurance that the assumptions described herein, the returns and targets (including without limitation target portfolio composition) indicated herein will be achieved. The views and opinions expressed herein include forward-looking statements which may or may not be accurate. Forward-looking statements can be identified by words like "believe", "expect", "anticipate", or similar expressions. You should not place undue reliance on forward-looking statements, which are current as of the date of this report. AXA IM disclaims any obligation to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise. The valuation of financial assets can vary significantly from the prices that the AXA IM could obtain if it sought to liquidate the positions on behalf of the Company due to market conditions and general economic environment. Such valuations do not constitute a fairness or similar opinion and should not be regarded as such. They follow the valuation policy of the Company as adapted from time to time in the best interests of the shareholders, taking into account the conditions of financial markets at that time. Volta qualifies as an alternative investment fund within the meaning of the AIFM Directive and is notified as such under the license held by AXA IM with the Autorité des Marchés Financiers (the "AMF") in France.
