### April Monthly Report At 30 April 2015

By obtaining access to and reviewing this monthly report, you acknowledge and agree to be bound by the following:

This monthly report does not constitute or form part of any offer or invitation to sell or issue, or any solicitation of any offer to purchase or subscribe for, any shares or other securities of Volta Finance Limited (the "Company") whose portfolio is managed by AXA Investment Managers Paris (the "Investment Manager"), or securities of any other entity (together, the "Securities"). Nor shall this monthly report or any part of it nor the fact of its distribution or publication (on the Company's website or otherwise) form the basis of, or be relied on in connection with, any contract or investment decision in relation to the Securities. This monthly report does not constitute a recommendation regarding the Securities. The information contained herein is for information purposes only, does not purport to contain all the information that may be required to evaluate the Company or any other entity or their respective financial positions.

This monthly report speaks only as of its date and neither the Company nor the Investment Manager is under any obligation to update the information contained herein. Certain information and estimates contained herein are originated by or derived from third parties and therefore the accuracy and completeness of such information and estimates has not been verified. It should also be noted that the financial information contained herein has not been audited. No representation or warranty whatsoever, whether express or implied, is given by or on behalf of the Company, the Investment Manager, their affiliates, or their respective directors, officers or employees or any other person as to (a) the accuracy or completeness of the information or (b) the opinions contained in this monthly report. None of the Company, the Investment Manager, any of their affiliates, or their respective directors, officers or employees or any other person accepts any liability whatsoever for any such information or opinions. Nothing contained herein here instal be relied upon as a promise or representation whether as to past or future performance of the Company, any other entity, any Securities or any asset class in the Company's portfolio. No statement in this monthly report is intended to be nor may be construed as a profit forecast and there can be no assurance that the assumptions described herein, the returns and targets (including without limitation target portfolio composition) indicated herein will be achieved.

The valuation of financial assets can vary significantly from the prices that the Company could obtain if it sought to liquidate the positions due to market conditions and general economic environment. Such valuations do not constitute a fairness or similar opinion and should not be regarded as such. They follow the valuation policy of the Company as adapted from time to time in the best interests of the shareholders, taking into account the evolutions and the illiquidity of financial markets.

## Comment

### Dear Shareholders and Investors,

### PERFORMANCE

At the end of April 2015, the Estimated NAV of Volta Finance Limited (the "Company", "Volta Finance" or "Volta") was €296.9m or €8.13 per share, a decrease of €0.17 per share since the end of March 2015. Taking into account the dividend paid in April (€0.31 per share) the monthly performance was 1.7%.

The YTD performance for 2015 stands at +10% as at the end of April.

### MARKET REVIEW AND PORTFOLIO ACTIVITY

The April mark-to-market variations\* of Volta's asset classes were: +0.5% for Synthetic Corporate Credit deals, +2.8% for CLO Equity tranches; +1.7% for CLO Debt tranches, -0.1% for Cash Corporate Credit deals and +27.2% for ABS. The positive performance of Volta in April reflects the positive stance on credit markets during the month as well as the gain from selling two UK non-conforming residual positions. Following these sales, we have slightly amended the assumptions used for the valuations of the remaining UK non-conforming residual positions in order to reflect the uplifted valuations achieved on realisation. These assets, which represent 4.8% of the GAV, are the sole assets in the overall portfolio which are valued on a mark to model basis.

In April, Volta purchased three new assets (the B and the BB tranche of a recently issued USD CLO and the equity tranche of a European CLO) for the equivalent of  $\in$ 12.0m and  $\in$ 3.5m was added to the warehouse position previously established. As mentioned above, two assets were sold during the month (two of the five UK non-conforming residual positions) for an equivalent of  $\in$ 12.2m and two USD CLO Equity tranches were called, generating the equivalent of  $\in$ 1.9m.

As previously reported, Volta has been participating in the financing of a CLO warehouse; the CLO priced as expected on 30th April and the closing is scheduled for 18th June. The European CLO equity purchase noted above is the equity of this particular CLO.

# **Comment (continued)**

At the end of April, Volta held €37.6m in cash, excluding an amount of €2.8m which is pledged as margin under its currency hedging facilities. All the new purchases mentioned above have as yet to be settled. Post settlement cash available stand at €27m.

Volta received the equivalent of €3.6m of interest and coupons in April 2015 (non-Euro amounts translated to Euro using end-of-month cross currency rates) bringing the total cash amount received in terms of interest and coupons during the last six months to €17.1m.

Volta's exposure to the US Dollar fell slightly during the month as the Dollar saw sustained weakness against the Euro. As at 30th April 2015 Volta had 37.2% net exposure to the US Dollar, after accounting for the impact of currency hedging.

In April 2015, no particular event materially impacted any of Volta's assets.

We continue to see opportunities in several structured credit sectors including mezzanine or equity tranches of CLOs, RMBS tranches as well as tranches of Cash or Synthetic Corporate Credit portfolios.

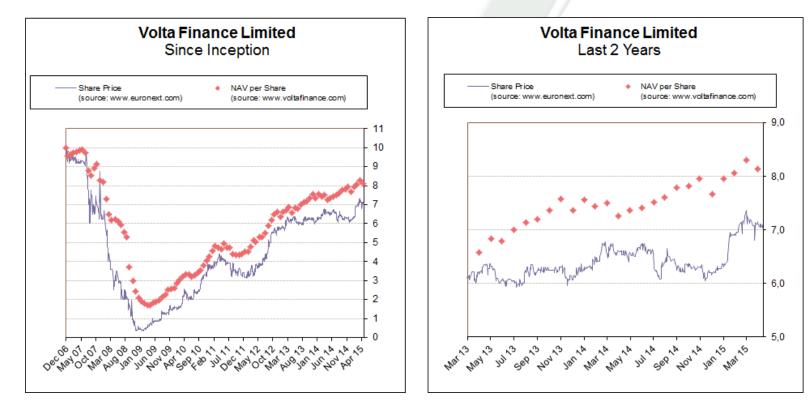

### LONDON STOCK EXCHANGE LISTING

An EGM was held on 6th May 2015, at which Shareholders approved the New Investment Policy, as set out in the Circular. As a result, the Company is able to proceed with the listing of shares on the Main Market of the London Stock Exchange. Admission is expected on or around 29th May.

\* "Mark-to-market variation" is calculated as the Dietz-performance of the assets in each bucket, taking into account the Mark-to-Market of the assets at month-end, payments received from the assets over the period, and ignoring changes in cross currency rates Nevertheless, some residual currency effects could impact the aggregate value of the portfolio when aggregating each bucket.

## **About Volta Finance Ltd**

Volta Finance Limited is incorporated in Guernsey under the Companies (Guernsey) Law, 2008 (as amended) and listed on NYSE Euronext Amsterdam. Its investment objectives are to preserve capital and to provide a stable stream of income to its shareholders through dividends. For this purpose, it pursues a multi-asset investment strategy targeting various underlying assets. The assets that the Company may invest in either directly or indirectly include, but are not limited to: corporate credits; sovereign and quasi-sovereign debt; residential mortgage loans; automobile loans. Volta Finance Limited's basic approach to its underlying assets is through vehicles and arrangements that provide leveraged exposure to some of those underlying assets.

Volta Finance Limited has appointed AXA Investment Managers Paris, an investment management company with a division specialised in structured credit, for the investment management of all its assets.

#### Synthetic Corporate Credit

This asset class regroups the Company investments in securities issued by collateralised swap obligations ("CSO") as well as bank balance-sheet transactions. Through this asset class, the Company aim to get an exposure to investment grade, sub-investment grade or unrated credits. The vast majority of these credit exposures are investment grade corporate credit exposures mainly through synthetic arrangements such as Credit Default Swaps ("CDS").

This asset class is split depending on the subordination to default of the securities. The equity positions have no subordination to default but receive a high cash-on cash payment; the debt positions benefit from subordination to default and receive a lower coupon payment.

Through a bank balance-sheet transaction, the Company aim to get an equity or mezzanine exposure to a specific core business of a bank. They are structured through synthetic arrangements, such as CDS, Total Return Swap or Credit Linked Note and are often private transactions.

### CLO

This asset class regroups the Company investments in securities issued by actively managed Collateralized Loan Obligations (CLO). This asset class is split based on the risk position within the CLO capital structure (ie between equity and mezzanine debt positions) and on the geographical main exposures of the underlying portfolio (ie US or European senior secured loans).

#### Cash Corporate Credit

This asset class offers a direct exposure to corporate credit portfolios (either investment grade, high yield or unrated). It currently encompasses an unlevered fund of leverage loans, a small and medium enterprise CLO equity tranche and an emerging market CDO debt tranche offering a cash exposure to a portfolio of mainly emerging market corporates.

#### ABS

This asset class regroups the Company investments in securities issued by structures for which payments depends on residential mortgage loans. This asset class is split based on the riskiness of the positions (ie between Residual Interest and debt tranches)
